

# Skylight Shade Measuring Guide

Use this handy guide to keep track of your skylight measurements.

For window measurements, download the measuring guide from our sister site, CellularWindowShades.com!

To ensure a proper fit, make sure you measure the **diagonal measurements** (top right corner to bottom left corner and top left corner to bottom right corner). If those measurements differ by more than 1/4" you will need to shim your skylight opening to accommodate the shade and retainer track.

- **Width:** Measure the exact inside measurement of the window at **the Top, Middle and Bottom**. Write the measurements down below. Circle the narrowest width measurement
- **Length:** Measure the exact inside distance from top of window to the sill at **the Left, Middle and Right**. Write the measurement down below. Circle the shortest length measurement.

<b>Room:</b>		<b>Color:</b>		<b>Window Number:</b>	
<b>Measurement</b>	<b>Measure #1</b>	<b>Measure #2</b>	<b>Measure #3</b>	<b>Diagonal Measurements</b>	
<b>Width (Inches):</b> Circle Narrowest				Top Left to Bottom Right Measurement:	Top Right to Bottom Left Measurement:
<b>Length (Inches):</b> Circle Shortest
